Subject: calls on Dimmock

---

There are a number of calls coming in regarding the situation in Dimmock, PA. I have received some of these myself. There is actually a Facebook page for Frack Action that has a campaign to call EPA, and has an 888-216-2811 number. Sometimes when I call that number it rings straight through to my desk! Anyone recognize that as an EPA hotline or something?

Anyway, Region 3 is the lead on this situation. For now, all we should do is read this approved statement and thank them for their input.

"EPA is working diligently to understand the situation in Dimmock and address residents' concerns. We believe that the information provided to us by the residents deserves further review and we have been actively visiting homes to learn more. We are in the process of determining next steps and reviewing the information we have in hand as quickly as possible so that we are able to provide some answers to affected residents. We hope to share more information soon with residents, the State and Cabot."

Please share this with anyone else who may field these calls from the public.

Thanks.
